Arizona ROC265218 – C11 (600V and Below)
Arizona ROC265219 – A17 (Above 600V)

FIELD SERVICES

- Service & Repair of Switchgear & Motor Control Centers
- 24-hour Emergency Service
- Protective Relay & Meter Testing
- Acceptance Testing & Startup Support
- VFD Installation & Troubleshooting
- Low & Medium Voltage Circuit Breaker Testing & Repair
- Electrical System Troubleshooting & Repair

- Testing:
 - Doble, TTR, Ductor
 - Insulation Resistance
 - Hipot, Time Travel
- Transformer Testing, Maintenance & Repair:
 - Vacuum Fill & Commission
 - Repair Leaks - Bushings
 - Testing - Oil Samples

SHOP SERVICES

- Remanufacturing of All Switchgear & Motor Control Types & Manufacturers
- Custom Relay Panel Fabrication (UL 508A Panel Shop)
- Complete Rebuild for All Manufacturers of Low Voltage & Medium Voltage Circuit Breakers
- Solid State Trip Unit Retrofitting & Repairs
- Electrical Testing of All Types of Low & Medium Voltage Equipment
- Fabrication of Portable Substations, Load Break Switches, Shovel Boxes, etc.

ENGINEERED SOLUTIONS

- Protective Relay Upgrade Design & Build
- Control Building/E-house Design & Build
- Skid Mounted Substation Design & Build
- Power System Reliability Studies

- Professional Engineers on Staff
- Custom Control & Protection Schemes
- Maintenance Program Planning
- Shutdown Planning & Management
- Modernization of Outdated Equipment

EQUIPMENT SALES

- Safe-T-Rack® Circuit Breaker Remote Racking Systems
- VFDs & Motors
- Switchgear & Motor Control Centers (Low & Medium Voltage)
- Relays
- Metering
- Enclosed Control

- Ground Monitors
- Neutral Ground Resistors
- Low & Medium Voltage Soft Starts
- Power Transformers: Padmount, Unit Substation, Polemount
- Circuit Breakers
- Contactors
- Ground & Test Devices
